

Upcoming Premier Hackathons Comparison (2026)

Curated Guide for Full-Stack Development & Data Science Candidates • Priority Regions: Bangalore, Tamil Nadu, Kerala

Strategic Advantage: As a candidate skilled in both **Data Science** and **Full-Stack Web Development**, you possess the ultimate hackathon toolkit. While traditional teams struggle to bridge the gap between analytical models and interactive applications, you can independently construct robust end-to-end operational software—giving you an exceptional competitive edge during live jury evaluations.

Hackathon & Companies	Reg. Fee & Deadline	Timeline (Start - End)	Format & Location	Stage Presentation	Eligibility & Team	Topic & Prizes

Key Participation Guidelines

- **Odoo Framework Lockout:** Please note that once you register for an official Odoo hackathon track, you are locked out from applying to any subsequent Odoo hackathon events for the following 3 months.
- **Hackfinity Institutional Policy:** Cross-college team formations are strictly banned by the RIT organizing committee. All teammates must belong to the exact same institution.
- **PromptWars Infrastructure Requirement:** Prior to arriving at any physical Google sprint or bootcamp venue, participants must have the proprietary Google AntiGravity IDE toolchain fully installed and configured on their development machines.
